Aim High

Grades are important to colleges, but they also respect the challenge posed by college-level classes, honors, and Advanced Placement. Push yourself hardest in subjects you love, since you're likely to do better in subjects that interest you.

Find Your Passions

Preparing for college isn't just about hitting the books. Explore a hobby. Try a sport. Join an academic club. Volunteer for a worthy cause. Learn an instrument. Colleges do want smart students, but they also want interesting students who love to learn. Keep a record of these activities to use for post-secondary applications.
